

READ Act Reauthorization (H.R.681/S.41)

LASER TALK

NOTES

Engage: Up to 70% of 10-year-olds in low- and middle-income countries are experiencing learning poverty. They are not receiving quality education.

State Problem: COVID-19 related school closures disrupted learning for nearly all of the world's 1.5 billion school-aged children. Now, in order to reach world education goals by 2030, we must enroll a child every two seconds.

Inform: Congress can support kids getting the foundational skills they need by co-sponsoring the bipartisan READ Act Reauthorization Act of 2023 in both the House (H.R.681) and Senate (S.41). The bill calls on the U.S. to update its foundational literacy and numeracy strategy. It calls for reaching vulnerable populations. And it calls for proof of robust monitoring and evaluation.

Call to Action for the House: Will you co-sponsor the READ Act and urge leadership to bring the bill to the floor?

(Call to Action for the Senate: Thank you for passing the READ Act last year!)
