

## Protect children and families by delaying devastating cuts to SNAP

**Engage:** Imagine the nation's most effective anti-hunger program being dismantled while wealthy corporations receive tax cuts. That's exactly what is happening.

**Problem:** Under last year's *One Big Beautiful Bill Act* (H.R.1), states will now pay a share of SNAP benefit costs. This unprecedented cost shift puts an estimated 2.4 million at risk.

**Inform:** States must now cut SNAP or threaten funding to other important services. Rural communities and low-wage workers will be hurt. Children, seniors, veterans, and people with disabilities will be hurt as well. A few states have received a temporary delay. But the House did not reverse or delay the cuts in their proposed Farm Bill.

**Call to Action:** Food prices are rising. Yet everyone deserves access to nutritious food. Congress must repeal or at least delay these devastating SNAP cuts for *all* states in any farm-related bill. We cannot allow this assault on food security to stand.
