

FY27 Appropriations Cheat Sheet: Global Fund

FY27 NSRP/SFOPS programmatic request: Global Fund to Fight AIDS, Tuberculosis and Malaria

Bill/Subcommittee: State, Foreign Operations, and Related Programs (SFOPS) / National Security, Department of State, and Related Programs (NSRP)

Department: State

Agency: PEPFAR

Account/Bureau: Global Fund to Fight AIDS, Tuberculosis and Malaria

Type of request: Funding/Programmatic

Your suggested FY27 level request: **\$1.53 billion**

FY27 President's Budget Request: TBD

FY26 President's Budget Request: \$800 million

FY26 enacted level: \$1.25 billion

FY26 House level: \$1.5 billion

FY26 Senate level: \$1.25 billion

FY25 enacted level: \$1.65 billion

FY24 enacted level: \$1.65 billion

Rationale/Justification:

Since the Global Fund was created in 2002, the U.S. has played a leading role, providing one-third of the Global Fund's financial resources. The Global Fund has always had unique bipartisan support, with the U.S. Congress as one of its champions.

This international partnership has helped save 70 million lives, reducing the death rate of the three diseases by 63 percent. In 2024 alone, the Global Fund's work resulted in 25.6

million people on HIV antiretroviral therapy, 7.4 million treated for tuberculosis (TB), and 162 million mosquito nets distributed.

At the 8th replenishment last fall, the Administration recommitted to match contributions with \$1 for every \$2 from other donors, up to \$4.6 billion. Securing one-third of the full \$4.6 billion in FY27 will demonstrate the U.S.' continued commitment to ending these diseases, bring other donors to the table, and protect millions from preventable illness and death.

Delivering on the first installment of the Administration's pledge will be key to delivering on the America First Global Health Strategy. It will:

- Scale up innovation and roll out revolutionary new tools to save more lives, like AI-enabled portable x-ray machines to screen for TB and injectable prevention for HIV.
- Spur other governments to increase health investments, through the U.S. match and country co-financing requirements.
- Drive down costs, stretching contributions to save more lives. In recent years the Global Fund helped secure price reductions of 20 to 50 percent for critical health supplies.

FY27 NSRP/SFOPS language request: Global Fund

Bill/Subcommittee: State, Foreign Operations, and Related Programs (SFOPS) / National Security, Department of State, and Related Programs (NSRP)

Department: State

Agency: PEPFAR

Account/Bureau: Global Fund to Fight AIDS, Tuberculosis and Malaria

Type of request: Language

Report Language Recommendation:

Global Fund to Fight AIDS, Tuberculosis, and Malaria.- The agreement supports the Administration's pledge of \$4,600,000,000 for the eighth replenishment of the Global Fund to Fight AIDS, Tuberculosis, and Malaria (Global Fund) and includes \$1,530,000,000 for the second installment of such replenishment. Such funds shall be contributed to the Global Fund on a quarterly basis to the fullest extent practicable, while leveraging matching contributions received from other sources. In addition to appropriations made under this Act, the Committee directs the Secretary of State to fulfill the United States commitment to the 7th replenishment by drawing upon any unobligated balances to make additional contributions to the Global Fund such that the total amount of United States contributions to the Global Fund is equal to 33% of all contributions to the Global Fund, cumulatively, since fiscal year 2004.

Rationale/Justification:

An appropriation of \$1.533 billion for the Global Fund in fiscal year 27 is consistent with the U.S. Government's pledge in November 2025 to contribute \$4.6 billion for the Global Fund's current three-year funding cycle. In addition, Congress has already appropriated funds to fulfill the previous U.S. pledge to the Global Fund, but which have not yet been delivered. Almost \$2 billion that Congress appropriated for the Global Fund's lifesaving work in fiscal years 2024 and 2025 has not been obligated, in addition to \$1.25 billion appropriated in fiscal year 2026.
