# Our Anti-Oppression Values

The logo for RESULTS, featuring the word "results" in white lowercase letters on a red speech bubble background.

*RESULTS is a movement of passionate, committed everyday people. Together we use our voices to influence political decisions that will bring an end to poverty. Poverty cannot end as long as oppression exists. We commit to opposing all forms of oppression, including ableism, ageism, biphobia, classism, colonialism, homophobia, racism, religious discrimination, sexism, transphobia, white saviorism, and xenophobia.*

*At RESULTS we pledge to create space for all voices, including those of us who are currently experiencing poverty. We will address oppressive behavior in our interactions, families, communities, work, and world. Our strength is rooted in our diversity of experiences, not in our assumptions.*

*With unearned privilege comes the responsibility to act so the burden to educate and change doesn't fall solely on those experiencing oppression. When we miss the mark on our values, we will acknowledge our mistake, seek forgiveness, learn, and work together as a community to pursue equity.*

*There are no saviors — only partners, advocates, and allies. We agree to help make the RESULTS movement a respectful, inclusive space.*

- Huge opportunity later this year: U.S. is host of the Global Fund Replenishment conference.
- We have been supporting Global Fund since 2002 because it works, saving 44 million lives
- First step in successful replenishment: Administration must be ready to make a bold pledge. Bipartisan House Sign-On letter was a key tool in this (137 signers).
- Next, we need Congress to provide \$2 billion for FY23.

Global Fund is seeking at least \$18 billion in pledges for work over the next three years. With \$18 billion the Global Fund can:

- Save an additional 20 million lives
- Drive deaths down by 64% from these three diseases
- Prevent 450 million new infections
- ROI of \$31 for each \$1 invested

We need the U.S. to pledge \$6 billion (one-third) and appropriate \$2 billion each year for the next three years

## Case for Investment

- *“Since no one is safe from infectious diseases until everyone is safe, protecting us all from pandemics will take a truly global effort.”*
- *“The communities most affected by pandemics, particularly those most marginalized, must be at the center, voicing their needs and designing responses that truly leave no one behind.”*
- *“We can turbocharge progress in the fight against HIV, TB and malaria, regaining ground lost during the pandemic and getting back on track toward finally ending these three pandemics by 2030.”*

## Case for Investment

- *“In 2020, for the first time in the Global Fund’s history, we saw declines in key programmatic results across all three diseases in the countries where we invest. HIV testing fell by 22% and prevention services by 11%”*
- *“The number of people treated for drug-resistant TB dropped by 19%, while treatment for people with extensively drug-resistant TB fell by 37%. Overall, the number of people being treated for TB fell by over 1 million.”*
- *“Malaria deaths and cases increased significantly in 2020, mainly due to COVID-19 disruptions. New estimates suggest a child is dying nearly every minute as a result of this mosquito-borne parasite. Malaria testing fell by 4%”*

# *Passing the Torch*

## Prepare for the future by strengthening health care

Feb 23, 2022

[f](#) [t](#) [in](#) [@](#)

Grateful to see such a positive headline about Covid. ("Positive test rate stays in single digits as Covid in full retreat" by J. Damon Cain, The Register-Herald, February 19). The article follows with the reality of current cases, hospitalizations, and the deaths of 16 West Virginians in the last 24 hours.

As the pandemic recedes, we need to learn the lessons of how to do better. One lesson the variants have taught us is to battle pandemics globally to protect us locally. President Biden is taking a major step toward this by holding the funding conference for the Global Fund to Fight AIDS, TB, and Malaria in America this year. The Global Fund has a proven track record of saving lives (44 million) in the last 20 years and for the last two years helping countries battle Covid, while strengthening local health care systems. Congress agrees, with 129 members already signing a letter calling on the president to make a bold pledge to the Global Fund. Such a pledge will inspire other donors and help us be better prepared in the future to beat what comes next.

So let's take heart and mourn our losses while preparing for the future by making sure Congress funds this critical initiative.

Willie Dickerson  
Snohomish, WA

## An ounce of prep

Snohomish, Wash.: We need more of this evaluation of pandemic handling and preparation. [\(The COVID lessons never to forget.](#) op-ed, Feb. 17). One important lesson not mentioned is that we are in this together — everyone on the planet. Without access to health care and responses such as vaccines available to all, variants have kept COVID surging, infecting and killing. The Global Fund to Fight AIDS, TB, and Malaria has been doing this work for 20 years with low- and middle-income countries to strengthen health care systems and battle disease. President Biden has seen the importance of this team effort and is holding this year's replenishment conference for the Global Fund. Nearly 100 members of Congress have already signed a letter calling for a bold pledge from America, which would signal to other countries to do the same. Call your members of Congress to find out if they support this effort. *Willie Dickerson*

## A little less free

Towanda, Pa.: America's 17th Amendment was ratified on April 8, 1913, to make U.S. senators electable by the state's voters versus being appointed by state legislatures, as in England and Canada (in England they call them Lords). The draconian displays by both governments to their people who are protesting should be of no surprise. You may wonder why our Canadian and English brothers and sisters put up with this. The fact is that Canada and England do not have representative governments that are as free as ours (the U.S.A. is not a democracy, but a
