

Tuberculosis: A Global Security Threat

Friday, September 29, 2017 | 1:00 pm - 2:00 pm

Dirksen Senate Office Building - Room 419 (Hearing Room)

Tuberculosis (TB) kills more people than any other single infectious agent, and drug resistant strains continue to spread. Women and children are more vulnerable to harder-to-detect forms of the disease.

Join us to hear from experts about the global epidemic as well as US-led efforts to build capacity and leverage an effective response.

Moderator:

David Bryden, TB Advocacy Officer, RESULTS

Speakers:

Dr. Sanjay Jain, Associate Professor of Pediatrics and International Health, Johns Hopkins University

Dr. David Dowdy, Associate Professor, Johns Hopkins Bloomberg School of Public Health

Cheri Vincent, Tuberculosis Division Chief, Office of Infectious Disease, Bureau of Global Health, USAID

Refreshments will be served

This is a widely attended event -- RSVP to dbryden@results.org

Sponsored by RESULTS, American Thoracic Society, and Infectious Diseases Society of America
